# COMPONENTS USED IN CREATING WEBSITE

## Make Your Website More Attractive

Keep it simple

White space is not that bad

Good photos and good videos

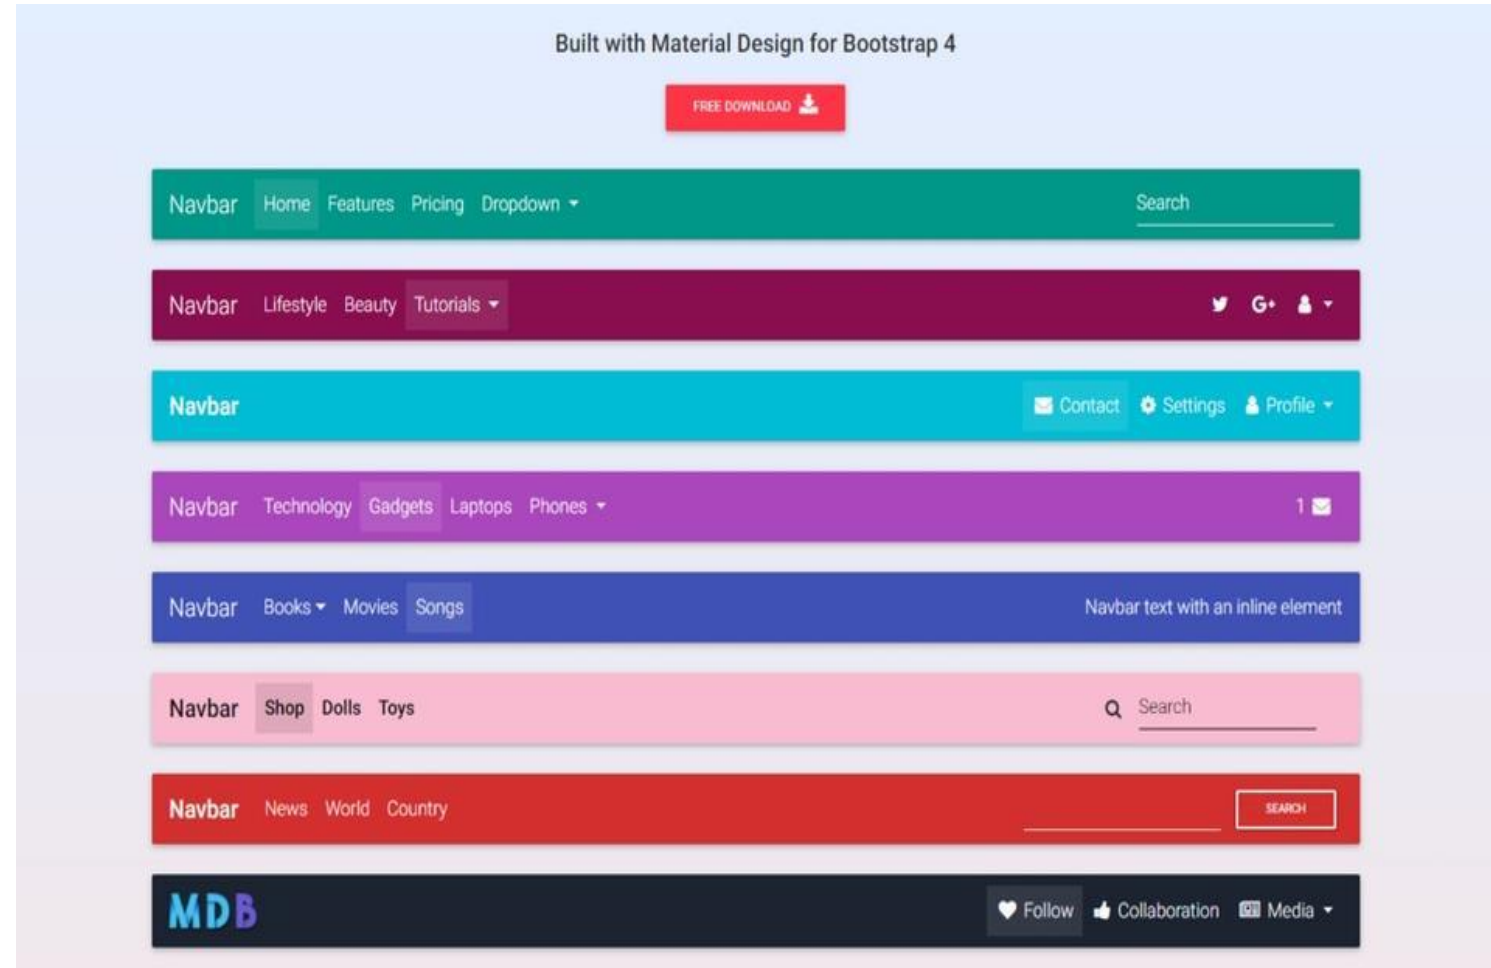

Content is your best friend

Fast and responsive website

# NAVBAR

A navigation bar is basically a list of links, so using the `<ul>` and `<li>` elements makes perfect sense.

# CAROUSELS

**Carousels** show a collection of items one at a time. They are also known as “slideshow” and “sliders”. Typical **uses of carousels** include scrolling news headlines, featured articles on home pages, and image galleries.

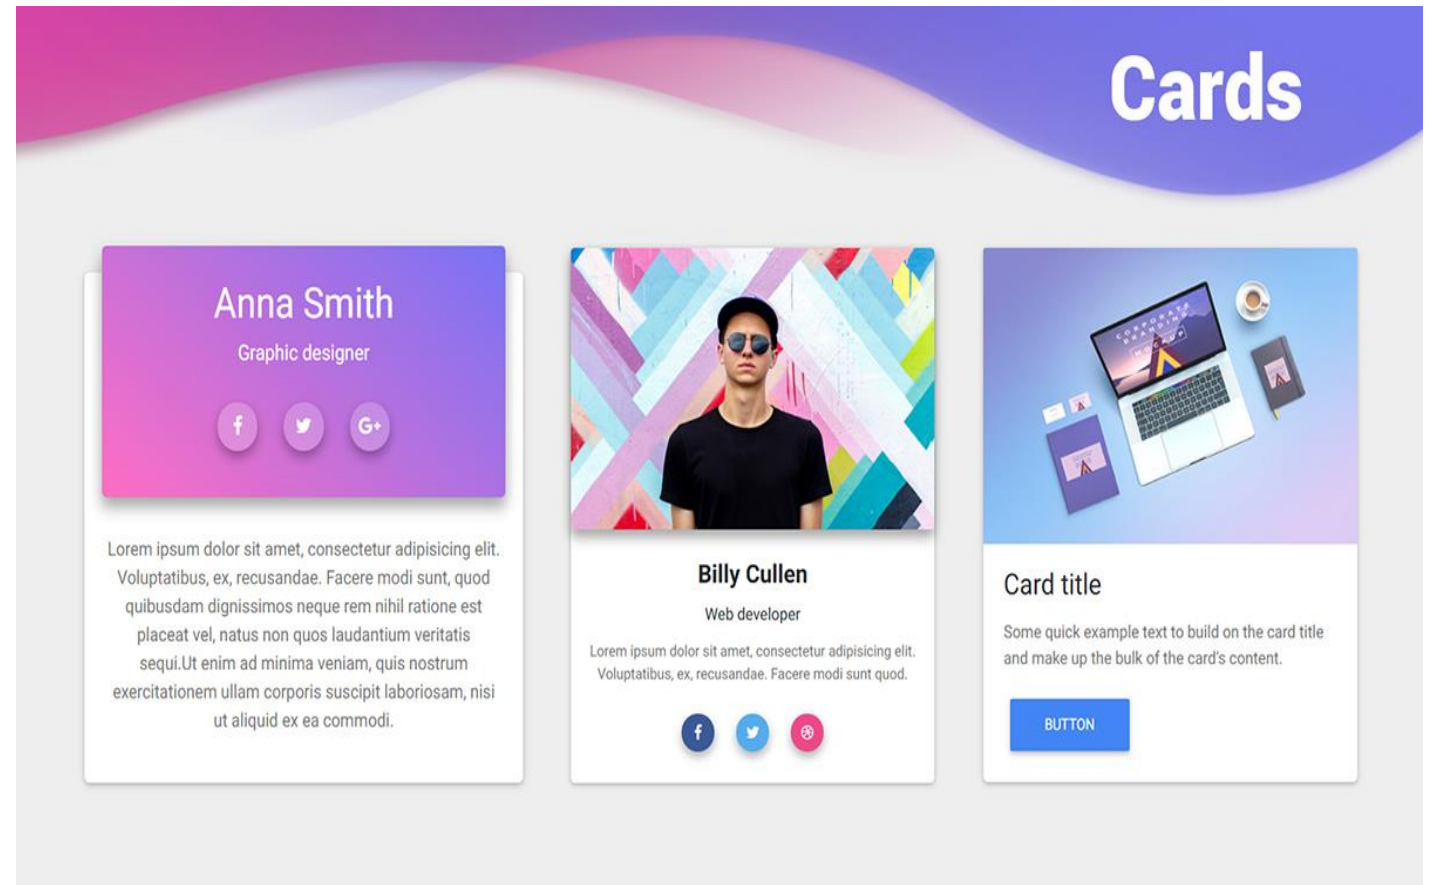

It also includes support for previous/next controls and indicators

# CARDS

A card is a flexible and extensible content container. It includes options for headers and footers, a wide variety of content, contextual background colors, and powerful display options

# FORMS

**Form** controls automatically receive some global styling with **Bootstrap** ,All textual `<input>` , `<textarea>` , and `<select>` elements with class

A screenshot of a contact form styled with Bootstrap. The form is titled "CONTACT US" and is set against a light blue background. It features three input fields: "First Name", "Last Name", and "Email address". Below these fields is a checkbox labeled "I agree to the Terms and Conditions of this Website." and a blue "Submit" button.

**CONTACT US**

First Name

Last Name

Email address

☒ I agree to the Terms and Conditions of this Website.

Submit

# BUTTONS

**Bootstrap** provides different styles of **buttons**:  
Basic Default Primary  
Success Info Warning  
Danger Link. To achieve the **button** styles above, **Bootstrap** has the following classes btn.

# JUMBOTRON

A lightweight, flexible component that can optionally extend the entire viewport to showcase key marketing messages on your site.

## Custom Jumbotron!

Using the gradient background for Jumbotron component

Convey and get attention.
